Cologne Digital Sanskrit Dictionaries

Welcome to the Sanskrit lexicons prepared since 1994 by the Institute of Indology and Tamil Studies, Cologne University.

The 42 dictionaries are organized primarily by the secondary language (English, German, etc.), and then by date of publication (1832 till 1993).

Each dictionary has several types of display (B L A M), as well as PDF scan and XML (in [SLP1](#)) files for download (D).

All dictionaries are also available for offline usage in android phones via [this application](#). It presumes that some form of stardict viewer is installed on your phone. You may try to install stardict viewer by searchi

Funderburk at Cologne 2004-2024

- Participated in the initial collaboration between Malten and Scharf/Hyman from about 2004.
- Since about 2008 the displays have been hosted at the **sanskrit-lexicon.uni-koeln.de** web-site, Jim's primary responsibility for developing and maintaining the site.
- In the next couple of years, Jim plans to retire from this responsibility, and **Dhaval Patel** will assume this role.

30 Years After Cologne Started...

- Digital copies of dictionaries are still **not identical** to the original printed books;
- We do not know how many entries dictionaries actually contain, as sopasarga and samāsa entries mostly **unidentified** yet;
- Not only we've unintentionally added new **digital typos**, the original list of corrections available in the printed books are not integrated (done only in GRA and MW).

Data Correction vs. Code & UI

Data Correction Champions

- We at Cologne are great at weeding out the dirt. The biggest Sanskrit **recycling plant** in the Milky Way.
- There are **no alternatives** for continuously corrected Sanskrit dictionary data since 1997

NonStop Error Correction

- Every other website / offline software, that contains a copy / uses **Monier-Williams** dictionary data, is taken from Cologne.
- Some 30, 20, 10 or 5 years ago. Depending on **errors left** the date of replication can be calculated

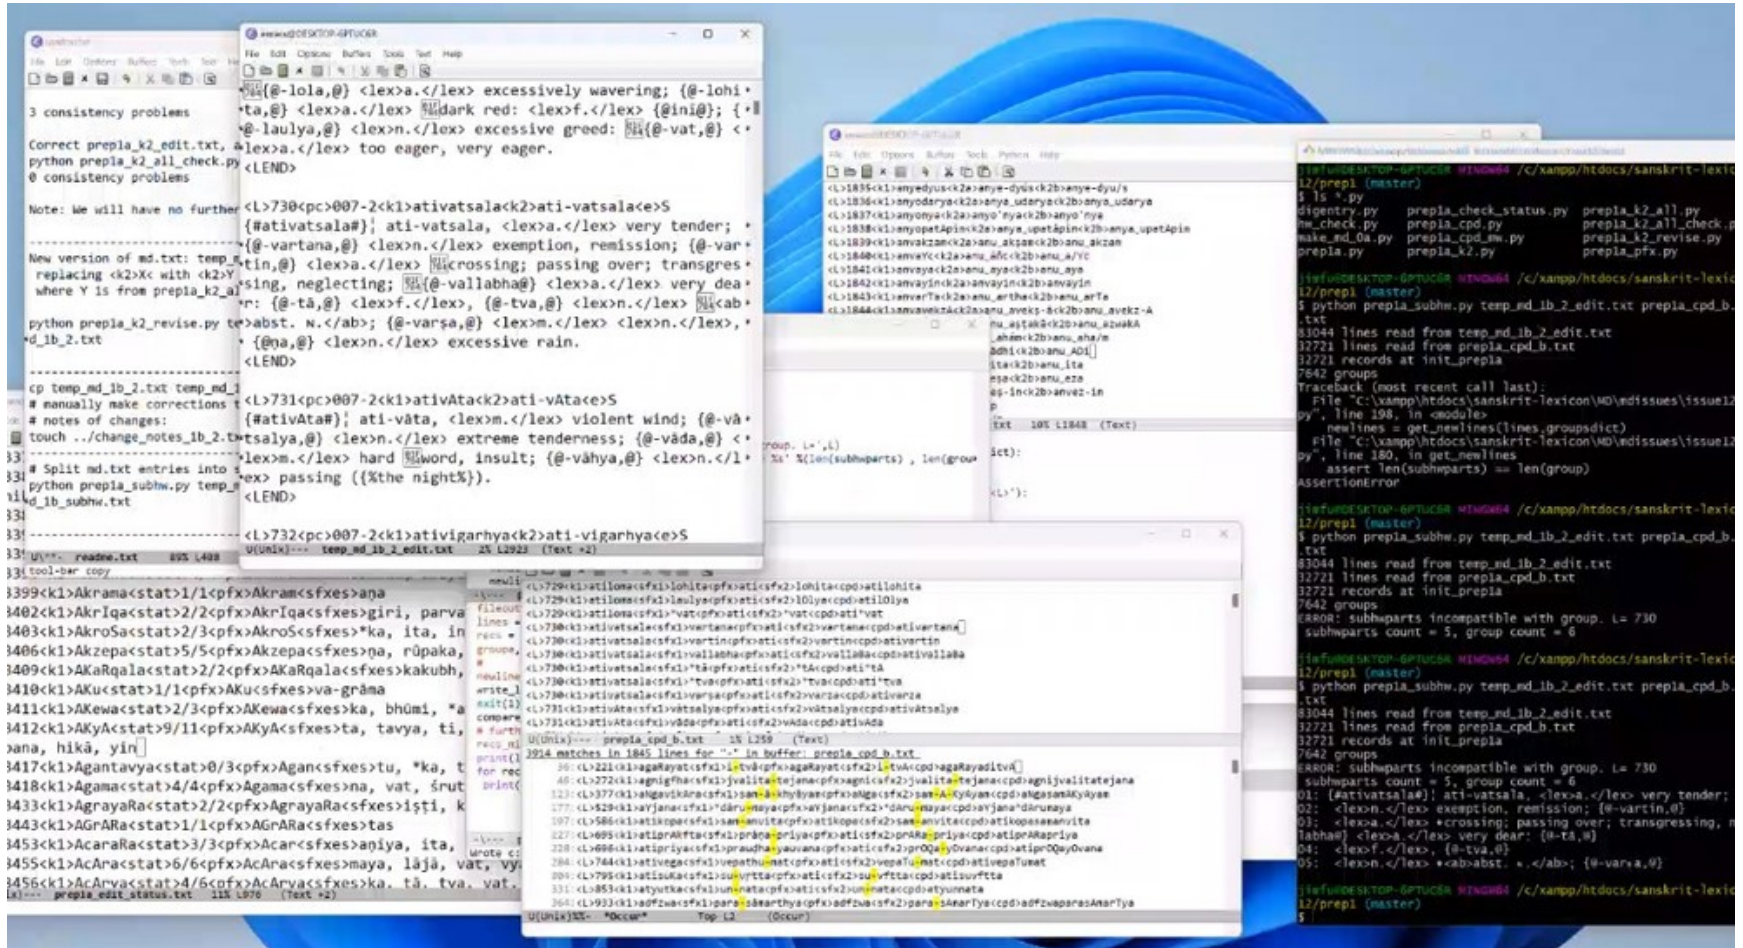

Correction of Errors

- one-by-one
 - headwords
 - entries
 - Sanksrit
 - nonSanskrit (English, German, French, Russian, Greek, Latin)
- **batch mode**
